Information Systems Analysts and Consultants

Information systems analysts and consultants plan, design and implement information systems and procedures; analyze the quality of software and systems; assess software and system security risks and investigate security breaches.

Software Engineers and Designers

Software engineers and designers research, design, evaluate, integrate and maintain software applications, technical environments, operating systems, embedded software, information warehouses and telecommunications software.

Computer Programmers and Interactive Media Developers

Computer programmers and interactive media developers write, modify and test computer code for application-level and operating systems-level software, or for interactive media, such as games, e-learning, and mobile applications.

Computer Network Technicians

Computer network technicians set up, maintain and optimize local and wide area computer networks. They may also set up and maintain internet and intranet web-servers.

User Support Technicians

User support technicians provide technical support to users experiencing difficulties with computer hardware, software and network connections.

Graphic Designers and Illustrators

Graphic designers and illustrators conceptualize and produce graphic art and visual materials to effectively communicate information for publications, advertising, films, packaging, posters, signs, web sites and more.
